

## ■ Task: Build a Static Job Portal Website (HTML + CSS)

### ■ Objective

Create a static website for a Job Portal application using HTML and CSS only. The site should have pages for both Employers and Jobseekers with proper navigation and professional styling.

### ■ Requirements

#### 1. Common Pages

- Home Page (index.html): Introduction + navigation menu.
- Sign In Page (signin.html): Login form (Email, Password).
- Sign Up Page (signup.html): Registration form (Name, Email, Password, Confirm Password, Role: Employer / Jobseeker).

#### 2. Employer Section

- Employer Profile (employer-profile.html): Company details (Name, Email, Location, About Company).
- Add Job (add-job.html): Form to post a job (Title, Description, Skills, Salary, Location).
- Job List (job-list.html): List/table of jobs posted by the employer.
- View Applicants (applicants.html): Table of applicants (Name, Email, Resume link placeholder).

#### 3. Jobseeker Section

- Jobseeker Profile (jobseeker-profile.html): Personal details (Name, Email, Skills, Experience, Resume link).
- Browse Jobs (browse-jobs.html): List of available jobs with "Apply Now" button.
- Applied Jobs (applied-jobs.html): Jobs the jobseeker has applied for (shown in a list or table).

### ■ CSS Requirements

- Use a common stylesheet (style.css) for all pages.
- Consistent color theme and layout.
- Proper navigation bar on all pages.
- Use cards or tables for job listings and applicants.
- Add hover effects on buttons and links.

### ■ Folder Structure

```
job-portal/
├── index.html           # Home Page
├── signin.html          # Sign In Page
├── signup.html          # Sign Up Page
├── employer-profile.html # Employer Profile
├── add-job.html         # Employer Add Job
├── job-list.html        # Employer Job List
├── applicants.html      # View Applicants
├── jobseeker-profile.html # Jobseeker Profile
├── browse-jobs.html     # Browse Jobs
├── applied-jobs.html    # Applied Jobs
├── css/
│   └── style.css        # Common CSS file
├── images/
│   └── (logos, dummy profile pics, etc.)
```

### ■ Deliverables

- Submit the complete project folder with HTML, CSS, and images.
- All navigation links should work properly between pages.
- Design should be professional, clean, and user-friendly.
